

Changelog — 108 AI Desktop Agent

[0.3.1] — 2026-06-15

Added

- Sprint 11 UI: pannelli terminale (/ui dashboard, /palette) e dashboard web locale (/ui web su 127.0.0.1:7891)
- Catalogo store locale per command/skill/agent (/ui store)
- API snapshot JSON per web UI (/api/snapshot)

Sprint 6 Hardening (wiring)

- Lazy-load integrazioni nel triage engine (Gmail, Calendar, Outlook, IMAP)
- Strategia context_window: summarize per persona agents con compressione cronologia
- Semantic cache lite (Jaccard su token) oltre cache esatta
- Rinnovo JWT preventivo prima della scadenza (ensureAuthFresh)

Added (continued)

- Command hooks: hooks.before / hooks.after in YAML → esecuzione command collegati (commands/hooks.ts)
- Agent MCP loop: tool mcp:server:tool nel system prompt + parsing blocchi `mcp` + follow-up LLM (agents/mcp-tools.ts)
- Fix syntax TS: office-outlook.ts, jobs/templates.ts, triage/scheduler.ts
- Fix import extensions/router.ts, extensions/lock.ts, extensions/gateway-llm.ts

Added (batch 2)

- MCP SSE/HTTP: SseMcpClient per transport: sse + url in mcp.yml
- Knowledge loader: knowledge: path su agent/skill (RAG-lite + structured)
- Command wizard: /command create <nome> [desc]
- Import: /import n8n, /import chatgpt, /import restore
- Export restore: /export restore <dir>
- LLM coalescing: dedup richieste concorrenti identiche (llm-coalesce.ts)
- Response compress: troncamento output lunghi prima di cache
- Docs: ADR-001, MULTI-AGENT-PLAYBOOK, extensions/CLAUDE.md, docs/INTEGRATIONS-API.md

Sprint 5 entry (Business Italia)

- Fatture in Cloud: adapter fatture-in-cloud.ts + triage billing source (fatture scadute)

Documentation (Sprint 7 min)

- docs/USER-GUIDE.md (IT)
- docs/SECURITY-RUNBOOK.md

[0.3.0] — precedente

- Extensions: commands, skills, persona agents, MCP stdio
- Triage engine, job engine, multi-agent orchestration
- Security: sanitize, PII guard, key vault, audit rotation
