Years Writing Code	Dev Velocity (AI)	Bug Rate Drop	Deploy Frequency	Team Satisfaction

PROFESSIONAL SUMMARY

Hands-on Technical Team Leader and Principal Software Engineer who writes code alongside the team — not just someone who manages tickets. 20+ years of continuous development across C# / .NET, Angular, Python, Java, TypeScript and React Native / Expo mobile stacks, from startup to enterprise scale.

Mobile across two stacks: React Native / Expo (TypeScript) for cross-platform iOS / Android delivery, applied at Aruba and TicketOne; Blazor Hybrid / .NET MAUI (C#) developed independently as a personal wellbeing product and applied commercially at Toscano Immobiliare. Coaches teams on both approaches and makes the trade-off explicit: the right stack for the context, not the same hammer every time. Python across scripting, automation and AI tooling.

Leads high-performing engineering teams at Italy's #1 ticketing platform (TicketOne / CTS Eventim Group) while remaining an active contributor across backend, mobile and AI workflows. Coaches engineers on safe AI-assisted development and helps ship applied AI capabilities inside real products — with verification, safety and ownership.

Unique trajectory: developer-first career that grew into team leadership while preserving deep technical depth. Certified NLP Counselor: creates psychological safety and raises team performance sustainably.

AI FOCUS — TEAM ENABLEMENT + PRODUCT AI

2019–2024 · Toscano Immobiliare Applied AI + Blazor Hybrid / MAUI Document intelligence for property content; predictive valuation; generative listing support; semantic search — integrated into multi-tenant product flows. Blazor Hybrid / .NET MAUI (C#) for native property agent app (iOS + Windows), sharing domain logic with the .NET backend. Expertise from personal WellBeing product applied in client delivery.	2024–2025 · Aruba S.p.A. AI-augmented delivery + React Native / Expo React Native Expo (TypeScript) mobile app for cloud ops (iOS + Android); EAS Build in CI/CD; Python for automation, data-prep and AI-assisted log analysis tooling — alongside service development and team coordination.	2025–Present · TicketOne Applied AI + SDLC AI + React Native / Expo Multi-agent workflows (Analyst→Architect→Dev→QA); AI quality signals on changes; React Native Expo (TypeScript) mobile extension for venue operations staff; Python for data pipelines and AI prompt orchestration.
---	--	---

WORK EXPERIENCE

TicketOne (CTS Eventim Group) | ago 2025 – Present
Head of Software Architecture & Development | AI / LLM Platform Builder
Italy's #1 ticketing e-commerce platform — sports, concerts, theater. 10k–50k transactions/hour at on-sale peaks.

C# .NET 8 · Java 21 Spring Boot · Angular 17+ · Python · TypeScript · Claude/AWS Bedrock · Multi-Agent LLM · Kafka · Kubernetes · gRPC · OpenTelemetry · Docker · GitLab CI

Hands-On Development & AI Engineering

- Personally designed and coded the production multi-agent LLM platform (Python + Anthropic SDK + AWS Bedrock): Analyst, Architect, Developer and QA agents cost-routed by task complexity.
- Wrote the LLM-powered CI/CD quality gate: Python pipeline that analyses every GitLab MR diff, detects PII exposure / anti-patterns / missing resilience patterns — BLOCKER / WARNING / INFO severity reports.
- Built AI-driven incident RCA agent correlating structured log streams across distributed services; cuts Mean Time To Diagnose on high-traffic peaks.
- Developed automated test generation pipeline (unit + integration, ≥80% coverage) from source code — reducing developer boilerplate by ~60%.
- Authored custom Claude Code CLI slash commands encoding domain standards, compliance rules and architectural constraints as executable prompts.
- Active contributor to Java Spring Boot microservices and .NET 8 services — writes production code, reviews PRs hands-on, solves critical bugs.
- Coaches the team on safe AI-assisted development: bounded context, output verification, tests, peer review and ownership of AI-assisted changes.
- Helps deliver applied AI product capabilities (document intelligence, semantic search, generative workflows) as normal software — with evaluation, fallback and clear owners.
- Provided technical direction for the React Native Expo (TypeScript) mobile extension of the venue operations toolchain (iOS/Android); reviewed code, established TypeScript conventions and integration patterns against SPORT backend REST APIs.
- Mentors developers on React Native patterns, Expo SDK lifecycle, offline state management and mobile security — same engineering bar as backend, not a simpler layer.
- Applies Python for data pipeline automation, AI prompt orchestration tooling and operational scripts; coaches the team on Python-first tooling as a productivity multiplier.

Team Leadership & Agile Transformation

- +50% team satisfaction — human-centered leadership, NLP coaching, psychological safety.
- +30% development flow — unified Jira workflow, Story Points, velocity tracking.
- Mentored engineers at all levels; established code-review culture and continuous learning rituals.
- Primary technical liaison for C-level, Product, and Eventim international HQ.

Architecture & Technical Governance

- Steering migration from legacy C++/CORBA + SETA monolith to microservices (Java Spring Boot, .NET 8, gRPC, Kafka, Kubernetes).
- API-First (OpenAPI 3.x), Self-Contained Systems, Security by Design, OpenTelemetry observability.
- ADR, Circuit Breaker / Retry / Bulkhead resilience patterns, structured JSON logging and distributed tracing.

Crisis Management

- Designed resilience patterns (circuit breakers, Queue-IT virtual queues) for on-sale peaks; participated in post-incident RCA (5 Whys).

Aruba S.p.A. (via SCAI Tecno) | Jun 2024 – ago 2025

Engineering Manager / Tech Lead

Italy's leading cloud & hosting provider — legacy e-commerce refactoring and cloud migration.

C# .NET 6/8 · Python · Kafka · MongoDB · Redis · SQL Server · Kubernetes · GitHub Actions · LLM CI/CD Tools · Microservices

- Wrote and maintained microservices in C# .NET as hands-on tech lead alongside managing 20 engineers (4 team leaders).
- 98% bug rate reduction in 4 months — enforced code quality standards and automated test coverage.
- +400% deployment frequency — authored automated GitHub Actions CI/CD pipelines from scratch.
- Python AI automation scripts for build pipelines, data migration, LLM-assisted code quality checks and operational tooling.
- Refactored legacy e-commerce into event-driven microservices (Kafka, Redis, MongoDB).

Toscana Immobiliare | Sep 2018 – Jun 2024

Technical Leader / Cloud Architect / Full-Stack Developer

Italy's largest real estate franchise — multi-tenant cloud-native platform for web, mobile and back-office.

C# .NET Core → .NET 7 · ASP.NET Core APIs · Blazor · .NET MAUI · Angular 8 → 15 · Ionic Angular · Python · scikit-learn · Azure Cognitive Svcs · Azure ML · GPT-3 API · Azure AKS · Azure Functions · SQL Server · Azure DevOps

- Led cross-functional team of 5 engineers: Scrum rituals, mentoring, code reviews, ADR practice — raised delivery predictability by 40%.
- Built full-stack platform: C# .NET APIs, Angular 8–15 SPA, Ionic Angular mobile apps (iOS+Android), Blazor back-office tools.
- Azure Cognitive Services: OCR pipeline for property contracts, image tagging, multilingual search — first AI integration in career.
- Python + scikit-learn: predictive property valuation models; Azure OpenAI (GPT-3) for automated listing descriptions.
- +50% scalability via Azure multi-tenant architecture (AKS, PaaS, Functions); -60% deployment lead-time via CI/CD automation.

Boken (Startup — founder) | Jan 2014 – Sep 2018

CEO / Software Architect / Lead Developer

C# .NET MVC · Angular/AngularJS · JavaScript/PHP · Ionic · iOS (Obj-C/Swift) · Android · SQL Server

- Founded and personally coded 'Velio' SaaS web-builder — 10,000+ active users; C# .NET backend + AngularJS frontend.
- Delivered 4 cross-platform mobile apps (iOS + Android) with Ionic + .NET APIs; managed team of 3 engineers.
- End-to-end ownership: product vision, architecture, development, marketing, investor relations.

Volkswagen Bank / Easyflysoft | May 2006 – Aug 2018

Delivered a React Native Expo mobile application (TypeScript) as a hands-on contributor alongside backend and platform work; established EAS Build in existing GitLab CI/CD.

Coached team members on TypeScript mobile patterns, offline-first architecture and push notification handling; set code review standards for the mobile surface aligned with backend engineering practices.

Introduced Python-based tooling for automation, data preparation and AI-assisted workflows; ensured scripts were tested, documented and team-owned — not black boxes.

Applied Blazor Hybrid / .NET MAUI (C#/Razor) to deliver a native property agent application (iOS + Windows), sharing service layer and domain logic with the existing .NET backend.

Brought hands-on Blazor Hybrid expertise from independent product development (personal wellbeing application) into a commercial delivery context.

Senior Software Engineer / Team Lead

C# .NET · AS400 Integration · SQL Server

- Led backend integration team (3 devs) for banking systems — AS400 ↔ .NET interfaces; -40% transaction processing time.
- Designed crisis management protocols for financial systems ensuring business continuity.

BPSOFT | 2010–2012

Mobile Developer

Objective-C · Swift · PHP

- Designed and launched 2 iOS apps (Objective-C + PHP backend) — 20,000+ downloads.

Earlier roles (2005–2010): Autogrill/Unisys · Epipoli · Mediobanca · Sanofi · Azcom Technology — Software Engineer / Team Lead. Stack: VB.NET, Oracle PL/SQL, C#, Oracle Forms, SharePoint, C++/Embedded CE. Led teams of 2–8 devs in enterprise projects for major Italian corporates.

CORE COMPETENCIES

AI / LLM Engineering

AI-Augmented Delivery · Team AI Conventions · Prompt Playbooks · Assisted Review & Test Design · Multi-Agent Workflows · RAG / Semantic Search · Evaluation & Safety · Claude / AWS Bedrock · Python AI

Mobile: React Native · Expo SDK · EAS Build · TypeScript (strict) · Blazor Hybrid · .NET MAUI · C# / Razor · MVVM · Offline-First · Push Notifications · REST / WebSocket · iOS /

	Android / Windows · Python tooling
Languages & Ecosystems	C# .NET 8/Core (20 yrs) · Python (7 yrs) · TypeScript/JavaScript (15 yrs) · Java 21 Spring Boot (4 yrs) · Swift/Obj-C · PHP · VB.NET
Frontend / Mobile	Angular 17+ · Ionic Angular · Blazor · .NET MAUI · React · RxJS/NgRx · TypeScript · SCSS/HTML5
Leadership & Methodology	Agile/Scrum/Kanban · Team Building & Mentoring · NLP Coaching · Psychological Safety · Velocity & KPI Tracking · Jira · Confluence · Magic Estimation
Architecture & Patterns	Microservices · DDD · Clean/Onion Architecture · SCS · CQRS · Event Sourcing · gRPC · REST/OpenAPI 3.x · ADP · SOLID · Result/Mediator Pattern
Cloud & DevOps	Azure (AKS, PaaS, Functions, Key Vault, Service Bus) · AWS Bedrock · Kubernetes · Docker · GitHub Actions · GitLab CI · Azure DevOps · Terraform
Observability & Resilience	OpenTelemetry · Prometheus · Grafana · Polly (Circuit Breaker, Retry, Bulkhead) · Structured JSON Logging · Health/Readiness Probes · SLI/SLO/SLA
Security & Compliance	OWASP Top 10 · GDPR · Fiscal/SIAE Compliance · PCI DSS · OAuth2/OIDC · JWT · SAST · Secret Management · Azure AD / Identity Server
Databases	MS SQL Server (15 yrs) · Oracle/PL-SQL (10 yrs) · MongoDB · Cosmos DB · MySQL · Redis

EDUCATION & CERTIFICATIONS

- ▶ M.Sc. Computer Science (5-year degree, 107/110) — Università degli Studi di Milano-Bicocca · 1997–2002
- ▶ High School Diploma in IT (58/60) — I.T.I.S. Marie Curie Milano · 1991–1996
- ▶ Certified NLP Counselor — PNL Meta · 2010–2013
- ▶ Certified Yoga Teacher — Hara Yoga · 2003–present
- ▶ Continuous training: Azure Cloud · DevOps · Security · Microservices · Python · AI/LLM Engineering

LANGUAGES

Italian: Native | English: C1 Reading / B2 Writing / B1 Speaking | Spanish: B1 Reading / A2 Writing

UNIQUE DIFFERENTIATORS

- ◆ **Developer-First Team Leader:** Writes code every day across backend, mobile and AI tooling — leads by example and unblocks the team hands-on.
- ◆ **Two Mobile Stacks, One Engineering Standard:** React Native/Expo (TypeScript, enterprise delivery) · Blazor Hybrid/MAUI (C#, independent product + Toscano) — coaches the full stack with first-hand experience on both.
- ◆ **Dual AI Focus:** Raises team capability with AI-assisted delivery while helping ship applied AI features safely — without creating AI dependency.
- ◆ **Human-Centered Leader:** NLP Counselor + Yoga Teacher — psychological safety and sustainable team performance.
- ◆ **Business Acumen:** Startup CEO + enterprise experience — product, ROI and engineering trade-offs.

EU work authorization · Theater & guitar enthusiast · Active tech community contributor
